KEI is proud to contribute to the renewable energy industry by supplying electrical solar cables to solar power plants. With a sharp focus on technology and innovation, the Company aims at becoming one of the key environment

1500V Photovoltaic Solar Cable find applicability in solar power generation. It is designed particularly to serve as inter connector between panel and devices. This cable is installed in exteriors, therefore it is made to be UV and weather resistant. It is made of best quality material and advanced technology as per the set industrial standards. We provide this 1

PV cables are specifically engineered to fulfill the DC interconnection requirements within photovoltaic systems, linking solar panels to components like isolators and inverters. The product offers exceptional mechanical properties and is suitable for both indoor and outdoor use. Constructed from high-quality materials, it is designed with an ...

Indicative prices for photovoltaic cables. Below is a table with indicative prices for different types of solar cables. These prices are approximate and may vary depending on geographic location, carrier, and exact cable specifications.
