How much does a solar panel cost?

Less efficient polycrystalline panels are typically cheaper at \$0.75 per watt, putting the price of a 400-watt panel at \$300. The cost of a solar panel also depends on how you buy it.

How much does a solar system cost per watt?

Ultimately many factors figure into the price per watt of a solar system, but the average cost is typically as low as \$2.75 per watt. This price will vary if a project requires special adders like ground mounting, a main panel upgrade, an EV charger, etc.

How much does a 400 watt solar panel cost?

Today's premium monocrystalline solar panels typically cost between \$1 and \$1.50 per Watt, putting the price of a single 400-watt solar panel between \$400 and \$600, depending on how you buy it. Less efficient polycrystalline panels are typically cheaper at \$0.75 per watt, putting the price of a 400-watt panel at \$300.

How much does a 5000 watt solar system cost?

A fully installed solar system typically costs \$3 to \$5 per watt before incentives like the 30% tax credit are applied. Using this measurement, 5,000 Watt solar system (5 kW) would have a gross cost between \$15,00 and \$25,000. The price per watt for larger and relatively straightforward projects are often within the \$3-\$4 range.

How can I reduce the cost of solar panels?

The next way to reduce the cost of solar panels is to shop for the lowest price like you would for cars or a new pair of hiking boots. In most areas of the US, there are at least a handful of solar installers willing to compete for your business.

Should you buy solar panels from a full-service installer?

If you purchase through a full-service installer, you will likely get a lower price for each panel than buying them individually from a retail store. It's worth noting (as we'll explore further below) that solar modules typically make up less than 20% of the overall cost of a home installation.
