Will a 5 mW 20 MWh battery storage system be built in Portugal?

Galp, a Portuguese energy company, has announced plans to build a 5 MW/20 MWh battery storage system in Portugal, in collaboration with Powin. The system at one of Galp's solar plants will enable it to adjust its PV production profile and meet its energy requirements. This project marks Powin's first venture in Europe.

Is powin launching a battery energy storage system in Europe?

This project marks Powin's first venture in Europe. Global energy storage supplier Powin LLC and Portuguese integrated energy company Galp have partnered to install a utility-scale battery energy storage system (BESS) in Algarve, Portugal. The 5 MW/20 MWh battery system will be built at one of Galp's solar power plants near the village of Alcoutim.

Why do we need batteries in Portugal?

"Batteries also add to the competitiveness of our renewable energy portfolio by making solar and wind power available when they are most needed." Large-scale energy storage projects in Portugal have been relatively small in number, although 2022 saw the inauguration of a 40GWh pumped hydro energy storage (PHES) project by utility Iberdrola.

Is Europe ready for energy storage?

Europe is expected to deploy over 90 GWh of utility-scale battery energy storage projects by 2030, and we are well positioned to support this demand along with the wider EMEA region's rapid energy storage growth," said Powin CEO, Jeff Waters.

How does the European Union support the new generation storage project?

These efforts are supported by the European Union under the Next Generation EU, through a grant from the Partnership Agreement of the Recovery and Resilience Plan (PRR) of the Portuguese Republic, regarding the NGS project - "New Generation Storage". Total project investment: 194.801.930,38 Euros.

How much solar power does Portugal have in 2022?

Portugal's cumulative PV capacity hit 2.59 GW at the end of 2022. It aims to install 20.4 GW of solar by 2030. The country has set a goal of at least 80% of electricity production coming from renewable sources by 2050. In November, it enjoyed a weekend of being powered solely by renewables.

Siemens Smart Infrastructure and Fluence have been awarded a contract by the Portuguese energy provider EDA - Electricidade dos Açores to build a battery-based energy storage system on Terceira. The project at the second biggest island in terms of electrical consumption of the Azores archipelago in the Atlantic Ocean aims to make the island ...

Global energy storage platform provider Powin LLC and Galp, Portugal's leading integrated energy company, have partnered to install a utility-scale battery energy storage system (BESS) at one of Galp's solar power plants near Alcoutim, a small village in the country's sunny southern region of the Algarve, where Galp operates several ...

Global energy storage platform provider Powin LLC and Galp, Portugal's leading integrated energy company, have partnered to install a utility-scale battery energy storage ...

Prototyping advanced inverters to power a sustainable future The challenge: Current inverters aren't designed for a grid run primarily on dynamic renewable resources like wind or solar. To maintain grid stability, inverters need to be smarter, faster and more reliable. The outcome: Tapestry and CSIRO prototyped a "smart" inverter that is faster, more efficient, and ...

StorSystems is driving the Portuguese energy transition by developing, building, and operating advanced battery storage systems. Battery storage allows power produced now to be stored for use later. It will be essential for a decarbonised and reliable energy network in Portugal.

ESS Inc is a US-based energy storage company established in 2011 by a team of material science and renewable energy specialists. It took them 8 years to commercialize their first energy storage solution (from laboratory to commercial scale). They offer long-duration energy storage platforms based on the innovative redox-flow battery technology ...
