

Power bank has no battery

How to fix a power bank not charging a mobile device?

To fix this you need to temporarily discharge the charge on your power bank.. Disconnect the power bank from a power source and charge any mobile device for a few minutes. Now,disconnect the mobile device from the power bank. Charge the power bank directly from a wall outlet and check if the charging LED blinks.

What if my power bank is not working?

If the battery level is above 80%,you can use the power bank without fear of it running out of power. If your power bank doesn't seem to be working at all,charge your power bankby connecting the charging port and charging port looping the cable around. Leave it plugged in almost for 10 seconds to reset your phone.

What if my power bank stops charging?

If your power bank stops charging,it's important to know what to do. Here are the three simple methods for resetting power bank: 1. Disconnect the cable from the device and hold down the reset button for at least 5 seconds. 2. If this doesn't work,try connecting the power bank directly to an AC outlet instead of a computer or phone charger. 3.

What if my power bank battery dies?

If your power bank battery dies even after following the checklist,it might be necessary to reset it. To do this,press and hold both buttons for 3 seconds until a green light flashes twice and then release both buttons. Sometimes problems can occur when the battery is not properly inserted or connected to the power bank.

What if the warranty on a power bank is not void?

If the warranty on the power bank is not void,you can get a replacement. In such a case,you need to contact the manufacturer. However,in case the power bank has physical damage on ports and cables,do not make attempt to fix it without expert supervision and directly take it to a local repair shop.

Can You charge a power bank at the same time?

Also,you should not charge a device simultaneouslywhen charging the power bank. When you are charging and discharging the power bank at the same time,it may seem like the power bank is not charging. If the warranty on the power bank is not void,you can get a replacement. In such a case,you need to contact the manufacturer.

Reconnect the power bank to the wall charger as if it were being charged; For 10 seconds, press and hold the Power button on the power bank's side; Charge the battery completely; Remove the power bank from the charger and unplug it; Your phone should now be charging after you connect it to the power bank

There are three simple methods for doing just that: by connecting to an AC outlet, using a computer, or through the manufacturer's website. If your power bank isn't holding a charge or you're having trouble
