

Prague battery mass production equipment manufacturer

What is lithium-ion battery factory of the future?

With our Lithium-Ion Battery Factory of the Future (LBF) project, we are developing highly efficient machines and processes for the fully automated production of next-generation lithium-ion batteries.

What is battery cell production?

Battery Cell Production As a supplier of turnkey production lines, we provide the complete production process for the manufacture of lithium-ion battery cells. Our expertise in automation, assembly, laser processes and integrated inspection systems enables innovative solutions for the production of pouch cells, prismatic cells and round cells.

Who is battery Gigafactory?

Battery Gigafactory Three companies, one goal: Together with our partners GROB-WERKE GmbH & Co. KG and Dür AG, we offer battery manufacturers complete solutions for lithium-ion battery production along the entire value chain. We are looking forward to your inquiry!

Magna Energy Storage a.s. was established in March 2017 with the aim of building a new plant for the production of high-capacity HE3DA® batteries in the Industrial Zone Frantisek, Horní Suchá. It is a purely Czech joint stock company with no foreign capital participation.

The aim of the M.E.S project is to build a new manufacturing plant for the production of high-capacity HE3DA® batteries. Magna Energy Storage a.s. will build the first production plant in ...

The aim of the M.E.S project is to build a new manufacturing plant for the production of high-capacity HE3DA® batteries. Magna Energy Storage a.s. will build the first production plant in the Frantisek Industrial Zone, Horní Suchá, Czech Republic with a capacity of 1.2 GWh per year, and is ready to further expand its production.

Regardless of the type of cell or battery produced, Bosch Rexroth understands the entire production process: Whether it be dosing, mixing, coating, drying or compacting. Rexroth automation solutions offer significant advantages for the entire production process and help you to increase your productivity and save resources.

R& D to mass production Electrode coating solutions The smarter way to produce lithium-ion battery electrodes Coated electrodes are the starting material for many energy storage devices and keep our daily life going. As the lithium-ion battery industry matures, pressure to decrease Improved stability and longevity for power solutions One coating technology - ...

Panasonic Energy today announced that it has finalized preparations for mass production of the 4680

Prague battery mass production equipment manufacturer

cylindrical automotive lithium-ion batteries, marking a much-anticipated breakthrough in the industry. The mass production is set to start after the final evaluation.

Our journey began 35 years ago in Prague, with a vision to revolutionize battery recycling. Today, we proudly expand our horizons, venturing into solar inverter and battery storage production ...

From the production of lithium-ion battery cells to the assembly of battery cells into battery modules or battery packs, we have the right production solution. With our modular production equipment and our enormous process expertise, we have been setting global standards in lithium-ion battery production for many years.

We offer a variety of partnership opportunities to maximize the potential of your black mass production. As a producer of black mass, you are fulfilling an essential step in the battery recycling value chain. Get in touch! Contact our experts to learn more about how we can help you achieve your goals. Contact us . Partnership opportunities. We are actively seeking new contract ...

Regardless of the type of cell or battery produced, Bosch Rexroth understands the entire production process: Whether it be dosing, mixing, coating, drying or compacting. Rexroth ...

Design and consulting company providing projects across the entire battery chain from raw material processing through battery cell manufacturing up to recycling. Engineering, custom ...

In June, LEAD introduced its self-developed all-solid-state battery production line, accelerating global mass production efforts. LEAD has identified key bottlenecks in the mass production of solid-state batteries, focusing on electrode and electrolyte film fabrication, as well as densification processes. The electrochemical and physical ...

Specialist in the manufacture of Li-ion battery packs. We design and manufacture prototypes, then mass produce battery assemblies. We use standard BMS but also have BMS of our own ...

From the production of lithium-ion battery cells to the assembly of battery cells into battery modules or battery packs, we have the right production solution. With our modular production ...

Our control technology enables end-to-end automation of all processes in battery manufacturing: from electrode production to module and pack assembly. PC-based control offers advantages ...

Magna Energy Storage a.s. was established in May 2017 with the aim of building a new plant for the production of high-capacity HE3DA® batteries in the Industrial Zone Frantisek, Horní Suchá. It is a purely Czech joint stock company with no foreign capital participation.
