

Price list of new solar powered boats

How much does a solar sailboat cost?

This solar sailboat is one of the most remarkable boats you can ever invest in and it clearly shows the latest advancements in technology. Prices: about \$8 million USD Where to buy: Sunreef Yachts. Larger surface covered with solar panels, that are installed also along the hull, and in other unusual areas. Unlimited cruising range.

Should you buy a solar electric boat?

Solar panels have come a long way in recent years, and modern solar electric boats are powered by high-quality, durable solar panels that can withstand harsh marine conditions and can be walked on. Investing in a solar electric boat is a way to stay on the cutting edge of boating technology while also doing your part to protect the environment.

What size boat can fit a solar powered boat?

Our minimum size boat which can qualify for this is 60' x 12'6" with a depth of 4'4" (gunwale to base plate). Our Solar Electric Propulsion System (SEPS) packages can be supplied directly allowing you to fit your own solar powered electric boat.

Are solar powered sailboats sustainable?

The solar powered sailboat generates enough green power not only to propel the boat and keep it moving but also to charge the essential electric water appliances and other water-sport toys. So far, the Sunreef Yachts Eco solar sailboats have earned a good reputation for being eco-friendly and sustainable.

Are solar boats eco-friendly?

With more steps being taken towards sustainable development, new, eco-friendly solar boats have been introduced in the world of green travel: solar electric catamarans. Solar boats are electric yachts that can go for long distances without needing to stop for fuel and without emissions.

Why should you invest in a solar electric boat?

Investing in a solar electric boat is a way to stay on the cutting edge of boating technology while also doing your part to protect the environment. With a love for open waters and centuries of boat building heritage in our blood, Elvene was founded on the idea to bring a fresh, environmentally friendly dimension to boating.

The ability to recharge your own batteries with the sun marks a new era of freedom. Depending on cruising speeds and weather conditions, our yachts have virtually unlimited range, enabling you to live a fully self-sufficient lifestyle on board. Unbound by the limitations of fossil fuels, you are free to explore the horizons.
