How does the OECD determine the price of lithium?

The OECD provides a comprehensive framework for determining the price of lithium. Here are the main factors that affect lithium price: Market Conditions and Demand: The surge in demand from electric vehicles, portable electronic devices, and energy storage options significantly influences lithium demand.

Are Lithium prices market-reflective?

Our lithium prices are market-reflective, assessing both the buy- and sell-side of transactions. You need transparency and clarity in these volatile markets and we recognize the importance of being clear about our lithium price assessment and index process. Our independently audited lithium pricing process aligns with core IOSCO principles.

Why are battery prices falling in China?

Despite the aggressive slowdown in the electric vehicle purchasing surge in China during the last two years, lithium miners refrain from closing operations to retain market share and business relationships with governments and battery producers. Consequently, battery input metals sustained their gluts and asking prices continued to fall.
