

# Regulations on rooftop solar panels

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

Are there building regulations for solar panels?

There are building regulations for solar panels, as there are for most home improvements. These government regulations are frequently updated to ensure that any alterations made to properties don't threaten the safety or health of people who live or work in them.

Will a solar roof be required for commercial buildings in 2027?

The commission is proposing a solar rooftop requirement for commercial and public buildings from 2027, and for new residential buildings from 2029. "I know this is ambitious, but it is realistic, we can do it," said von der Leyen, noting that investment in renewables is the bloc's "biggest task."

Are solar panels legal?

Solar panel installations have to pass standard building regulations for the property - it's a legal requirement for many home improvements. The key areas are structural safety of a building (Part A) and electrical safety of a building (Part P).

When will rooftop solar be available in Europe?

The president of the European Commission, Ursula von der Leyen, has announced a mandate for rooftop solar on commercial and public buildings by 2027, and for residential buildings by 2029. The EU target for renewable energy has been increased from 40% to 45%.

Do I need a structural report for a flat roof solar installation?

It is also highly advised to obtain a structural report for even a small flat roof solar installation, to ensure the roof can withstand the weight of the racking, which will be heavier on a flat roof due to the nature of the racking required.

In the major economies achieving rapid deployment of rooftop solar, a number of authorities such as German states and the Japanese city of Kyoto have mandatory requirements for ...
