

Rent out the roof of a farm house for solar power generation

Should you rent out your roof space for a solar system?

Renting out your own roof space for the operation of a solar system offers the owner a lucrative secondary income stream. We operate the system and feed the electricity into the grid receiving a remuneration for the sale of energy. The roof owner can benefit by renting out his roof space without having to invest himself.

How much does a solar farm lease cost?

See below for more on what makes your land ideally suited for a solar farm. Granted your property adheres to all necessary solar farm land requirements, the typical solar farm lease rate varies between \$600 - \$1,200 per acre for every year of your contract.

Who should I hire for a solar farm project?

Preferably hire someone with knowledge and experience in solar farm projects. Your attorney will make sure that certain wording in the contract that gives the upper hand to the developer is avoided. It must not, for instance, require you to relinquish your land in any case or give "easements" to the developer -- whatever that means!

How much land does a solar farm take up?

Solar farms can take up a few acres of land or tens of thousands. There are many reasons for the wide differences that we'll explain in this section. The size of a solar farm defines how much electricity it creates. The bigger the solar farm, the greater the power output.

How do solar farms work?

In the case of solar farms consisting of thousands or hundreds of thousands of PV modules on your property, the developers will sell the electricity created by the solar panels to a public utility in urban and suburban areas. In rural settings, the power will go to an electric cooperative.

What is a solar farm?

Also called solar parks, plants, fields, or power stations, solar farms are becoming commonplace throughout the world. As countries, states, and municipalities transition toward phasing out fossil fuels as energy sources, they are actively looking to expand clean energy capacity -- namely, solar and wind energy -- in their jurisdictions.

So, if you do have some empty roof space going to waste, reach out to YSG Solar today and learn how much you could earn by renting your roof for solar. How Does Renting Your Roof For Solar Work?
