

# Republic of Congo New Energy Storage Requirements Document

What is the main priority for the Democratic Republic of Congo's power sector?

The main priority for the Democratic Republic of Congo's power sector is to increase access to electricity. The Democratic Republic of Congo is a large country with 10 million households of which 1.6 million have access to electricity. This makes it the third largest population in the world without access to electricity.

What does 3% energy transfer mean for DRC?

3% ENERGY TRANSITION IN ACTION Grand Inga hydropower project The DRC has vast solar, wind and hydropower potential, and the government committed to increasing the share of renewable energy in the national energy mix as part of its nationally determined contributions (NDCs) under the Paris Agreement. In 2013, the government announced plans to deve

What is the government's vision for power generation in Congo?

The government's vision is to increase the service level to 32 percent by 2030. Lack of access to modern electricity services impairs the health, education, and income-generating potential of millions of Congolese people. Most power generation development is directed and funded by mining companies seeking to power their facilities.

How does the Democratic Republic of the Congo support the economy?

In the AC, Democratic Republic of the Congo supports an economy six-times larger than today's with only 35% more energy by diversifying its energy mix away from one that is 95% dependent on bioenergy.

Could the Congo become an electricity exporter?

Almost all electricity generation today comes from hydropower and the Inga project has the potential to provide much more. If network constraints are addressed, Democratic Republic of the Congo could become an electricity exporter.

How many people live without electricity in the DRC?

This makes it the third largest population in the world without access to electricity. If electrification efforts follow the same pace as during the last decade, 84 million people - or 80% of total population - will still live without electricity in the DRC by 2030.

It's 9 on Monday night in Manono, a small town in the Tanganyika province in the Democratic Republic of the Congo (DRC). Today in the once-thriving city, the streets are dotted with the remnants of industrial mining equipment after the ...
