We can design traditional solar solutions that install onto the roof of your home, or we can work with you to design and construct freestanding or adjoining overhangs, carports, garages, cabanas etc. that integrate solar panels on their roofs. Although our custom structures are visually and aesthetically pleasing, they are tough enough to withstand hurricane-force winds, rain, sleet, ...

Residential solar systems utilize photovoltaic (PV) panels to convert sunlight into electricity, powering your home with renewable energy. These systems typically include solar panels, an inverter to convert direct current (DC) to alternating current (AC), and sometimes a battery for energy storage. The solar PV residential systems can power ...

Residential Solar Design Solutions
