Will a new battery factory be built in Latvia?

Facebook The Swedish company Anodox Energy Systems wants to build two factories in Latvia to produce batteries for electric vehicles. According to Latvia's Ministry of Economy, a plant for the assembly of battery packs will be built first in the port of Riga. The second plant, which will focus on cell production, is to follow shortly afterwards.

Are electric vehicle batteries coming to Latvia?

Swedish tech company Anodox Energy Systems has announced plans to produce electric vehicle batteries in Latvia, with the first factory in the Port of Riga expected to be operational by December 2022. A second factory for rapidly growing LFP cell technology will be established soon after.

How much will Riga invest in LFP cell technology?

A second factory for rapidly growing LFP cell technology will be established soon after. A total of EUR50 million will be invested and up to 300 new jobs will be created. This announcement aligns with Riga's effort to establish Latvia as a European hub in the global automotive value chain.

How much money will Anodox invest in Riga?

A total of 50 million euros will be invested and up to 300 new jobs created, according to the Ministry of Economy. The factory in Riga is to go into operation by December 2022. In the first phase, Anodox wants to produce high-quality battery packs for electric cars and light commercial vehicles in the automated factory.

Why did Anodox Energy Systems open a factory in Riga?

"We are very glad that Anodox Energy Systems decided to open factories in Riga. This will bring investment, jobs, and income to the city as well as assess the attractiveness of opportunities that our city offers by ensuring that Riga is competitive in attracting new high-growth companies.

Will LFP be the first battery factory in Europe?

The planned LFP factory is to be the first of its kind in Europe. "This means that the battery production cycle will be completed in Latvia, from raw material to complete system," says Kaspars Rozkalns, director general of the Latvian Investment and Development Agency.

Battery Venture: Anodox will start battery production in Riga - Latvia ; Support has been gained from Latvia's minister of economics - Janis Vitenbergs; Anodox will enter the local "green corridor" priority investment support programme ; Anodox will be the first LFP cell production company in Europe

Swedish tech company Anodox Energy Systems has announced plans to produce electric vehicle batteries in Latvia, with the first factory in the Port of Riga expected to be operational by December 2022. A second factory for rapidly growing LFP cell technology will be established soon after.

# Riga battery cell manufacturer

Swedish company Anodox Energy Systems has announced plans to produce electric vehicle batteries in Riga and will create up to 300 new jobs. From december 2022, the company plans to invest up to three million euros and will employ around 40 people to assemble electric car batteries.

Founded in 1995, specializing in electronic products, battery packs and energy storage solutions manufacturer, the battery mainly produces lithium ternary, lithium iron phosphate, solid-state batteries, etc., the industry chain covers lithium iron phosphate cathode materials, battery cell production, BMS.

Brussels, November 7 th, 2024. Ten consortia, led by the world's leading battery cell manufacturers, successfully complete the largest pre-competitive effort to establish harmonised battery passports achieving a new milestone towards more ...

Ultra-high Power Cell Manufacturer. 40 years" research & technologies, push-to-the-limit dedication. Advanced R& D. Leading Tech. Proven choice from No.1 market leaders. MOLICEL#174; does not compromise on performance, neither should visionaries. Discover More &gt; Our Products. Cells with Unbeatable Power. Application-driven cells featuring high capacity, &gt;10C discharge ...

ASOTO O#220; is an innovative company registered in Estonia with a factory and warehouse located in Riga, Latvia. ASOTO O#220; primarily designs and produces bespoke gas-powered plug & play power plants and battery energy storage systems. ASOTO has gained a ...
