

Saint Lucia New Energy Storage Enterprise

What is Saint Lucia's energy transition opportunity?

RESULTS Saint Lucia's energy transition opportunity provides a win-win situation in which the Government of Saint Lucia supports constituents through cheaper electricity, and LUCELEC continues to profit and provide reliable service.

What is the future of electricity in Saint Lucia?

At the same time, recent developments in energy efficiency, renewable energy, cleaner-burning fuels (e.g., natural gas), electricity storage, and advanced controls and metering present a myriad of opportunities. Saint Lucia's current electricity system is well managed, reliable, and equitable.

Is Saint Lucia's Electricity System reliable?

Saint Lucia's current electricity system is well managed, reliable, and equitable. This can be primarily attributed to the fact that LUCELEC is a responsible and financially sound utility.

The \$20 million project, located north of Hewanorra International Airport, is historic for Saint Lucia. It is the first utility-scale renewable energy project on the island and is funded, owned and operated by LUCELEC. Its nearly 15,000 panels will generate approximately 7 million kWhs (or units) of electricity per year. Construction of the ...

in the global energy sector now require a new approach to Saint Lucia's electricity sector. In 2014, the Government of Saint Lucia announced refined energy targets, setting a renewable energy penetration target of 35 percent and an energy efficiency target of 20 percent reduction in consumption in the public sector, both to be achieved by 2020. In 2015, Saint Lucia submitted ...
