Seasoned visual inspection workers can provide support during the car battery inspection, but ever-changing, demanding quality requirements combined with an increased demand for EV batteries is making it more difficult for employees to manually complete this task. Reducing manual visual inspection efforts is necessary for improving yield.

A report that was published by the United Nations Development Program on the disposal of electric vehicle batteries states that Samoa does not possess sufficient capacity to dispose of all types of batteries within Samoa. The main reasons for this inadequacy include a lack of economies of scale a...
