

San Jose Enterprise Battery

Are battery startups making the Bay Area a top destination for energy storage?

The Bay Area is becoming a top destination for battery startups in energy storage. Some innovative startups are making batteries for electric vehicles and wearable devices. Others are creating new ways to store energy. And some are on the hunt for new materials to make batteries more environmentally friendly.

Where are EV batteries manufactured?

CEO and co-founder Gene Berdichevsky of Sila Nanotechnologies has a long history in EV battery development. He was employee No. 7 at Tesla Inc. in 2004, helping develop the battery used in its first car, the Roadster. The anode material for batteries is planned to be produced at a new Sila factory in Moses Lake, Washington, beginning in 2024.
