

# Saudi Arabia buys lithium batteries

Can Saudi Arabia produce lithium for batteries?

A Lithium brine pool. Saudi Arabia is exploring projects that can produce lithium for batteries in an effort to ramp up production in the Middle Eastern oil exporter.

Could Saudi Arabia become part of the global battery industry?

Saudi Arabia is a step closer to becoming part of the global battery industry after deals to develop lithium processing and anode material projects in the country. The deals could make Saudi Arabia's lithium ion supply chain the most developed in the Middle East, which right now has virtually no battery material capacity. Saudi Arabia's [...]

Why is Saudi Arabia sourcing lithium from overseas?

REUTERS/Hamad I Mohammed Purchase Licensing Rights RIYADH, April 28 (Reuters) - Saudi Arabia is committed to sourcing lithium from overseas as it looks to produce EV batteries and invest in the electric vehicle sector, a senior minister said in an interview, noting attempts to secure domestic supplies were at an early stage.

Why is Saudi Arabia planning a second lithium processing facility?

Saudi Arabia is planning a second lithium processing facility, as it steps up efforts to work with western partners to develop its battery supply chain. The facility, which will use feedstock mined in Austria to produce refined lithium hydroxide for BMW, is a sign of how supply chains to process the metal are slowly developing outside China.

Can Saudi Aramco extract lithium from brine?

Separately, Saudi Aramco is working on a joint project to extract lithium from brine taken from oil fields, the state energy giant said in an e-mailed response to questions. The presence of lithium and its concentrations and the prospects for extraction are being evaluated, the company said.

Will Saudi Arabia develop a lithium hydroxide plant in 2026?

Earlier this year Saudi Arabia signed an agreement with EV Metals, an Australian battery manufacturer, to develop a lithium hydroxide plant that will be in production in 2026. Lithium processing is highly energy intensive and Sage said Saudi Arabia was an attractive location for a processing facility because of its cheap energy.

Saudi Arabia is exploring projects that can produce lithium for batteries in an effort to ramp up production in the Middle Eastern oil exporter. The country, in the midst of revamping its economy ...

Saudi Arabia's oil wealth means it can afford to establish itself as a hub for EVs to make use of whatever lithium it produces. The kingdom has established its own EV brand - Ceer - and has built an EV metals plant.
