

Combines photovoltaic cells with solar thermal panels, so that the same panel can generate heat and electricity. The technology is still very new, so needs specialist installation with higher costs. The thermal portion of a PV-T panel doesn't reach as high temperatures as an independent solar thermal panel, so you'll still need a primary heating system. Solar panels are typically fitted on ...

If you're struggling in sales, it's either you, or the product/company, and in solar there is an overabundance of crappy companies with crappy products and crappy sales teams, and an overabundance of "Sales reps" that don't know the first thing about Sales as a profession. Be honest with yourself if you or your company fits that bill, and change it. Success in this ...
