

Solar Street Light Battery Price List

How much do solar street lights cost?

The cost of all-in-one solar street lights is much cheaper than that of Split-type solar street lights. Its average cost ranges from \$90 to \$200. The installation cost is not included in the given price. Two-in-one solar street lights have a solar panel installed on the body lamp's top powered by batteries, LED fixtures, and controllers.

Which battery is best for solar street lights?

If the ambient temperature you use is relatively high, such as in Africa, the Middle East, Southeast Asia, and other regions, then solar street lights with LiFePO₄ batteries are the best. If you request low price solar street lights or are only used for residential places, then just choose the solar street lighting with 3.7V or 3.2V Battery packs.

What is solar LED street light?

Solar LED street light comprises Solar PV Module for battery charging, inverter, controllers, poles, and light-emitting diode (LED) lamps for its light sources. Among other lamps, LED is one of the practical and common lamps because many manufacturers offer them in a variety of styles, shapes, and sizes.

How much does a split solar street light cost?

Split solar street light's cost varies according to its materials, poles, and installation. Typically, the entire set costs double the price of an integrated solar street light with its average cost ranging from \$150 to \$400. The installation is not yet included in this average total cost.

What is the rated voltage of a solar street light?

The rated voltage of the single unit is 3.2V, and the charge cut-off voltage is 3.6V~3.65V. Solar-street lights with lithium iron phosphate batteries on the market are generally divided into 3.2V systems, 6.4V systems, and 12.8V systems. For small power and strict price requirements, 3.2V battery packs are generally used.

What is integrated solar street light?

Integrated Solar Street light consists of a Solar panel and LED luminaire with built-in Lithium-ion /Lithium Ferro Phosphate battery (LiFePO₄) battery and solar driver card with charge controller. In addition, LED luminaire has a motion sensor to increase /decrease the LED light brightness on detecting any movement near the solar light.
