What is a 380 watt solar panel?

Certified for the most challenging environmental conditions, the Phono Solar 380 watt module withstands a 5400 Pa snow load. This high-power monocrystalline solar panel operates at 19.58% efficiency to maximize the light absorption area. The Phono Solar 380w solar panel is ideal for grid-tied commercial and residential solar panel systems.

What is an off grid solar power system?

Off grid solar power system doesn't connect to the power grid. In general, it includes solar panels, charger controller, batteries and inverter. This system will store the solar power into the batteries, batteries energy will be converted the electricity power to supply the appliances working through the inverter.

What are the components of a solar power system?
