

# Solar power generation money for rental houses

Can a rental property use a solar system?

The so-called „user-investor dilemma" is still considered one of the hurdles that impede the use of solar installations on rental properties' rooftops. Tenants have an interest in low-cost electricity from renewable sources, but cannot invest in a solar system as part of the rental property. Landlords can invest, but have no need for electricity.

Can a tenant invest in a solar energy system?

Tenants have an interest in low-cost electricity from renewable sources, but cannot invest in a solar system as part of the rental property. Landlords can invest, but have no need for electricity. This hurdle to the expansion of solar energy could possibly be overcome on the basis of the law on service charges.

How can you charge tenants for solar power?

You can charge tenants for solar power produced by the solar panels on a rental property by integrating the solar energy generated into the tenants' utility bills or through a separate line item charge.

Can a homeowner lease or rent a solar power system?

No, only the homeowner can enter an agreement to lease or rent a solar power system. Solar leases and rentals are designed to be long-term arrangements, so there's a big financial penalty for removing the solar panels before the contract term is up.

What are the benefits of solar panels on a rental property?

Installing solar panels on a rental property offers several benefits. One of them is the increase in property value, as advanced technology like solar panels can attract more interest from environmentally-conscious renters.

Can solar panels be depreciated on a rental property?

Yes, solar panels installed on a rental property can be depreciated as a capital improvement. This allows you to recover some of the installation cost and reduce your tax liability by spreading the cost over the solar panels' useful life, according to the tax laws in your jurisdiction.
