Flush mounts. With the help of these mounts, you can install your solar panel onto an RV, on rooftop or against the side of a pole, on your roof. You can even install them as a free-standing unit. The first step is to calculate the cost involved in setting up the type and size of the system.

What is a photovoltaic (PV) system?

At the heart of it all, a Photovoltaic (PV) system is an eco-friendly powerhouse that converts sunlight into usable electricity, allowing us to power our homes with renewable energy. This system is essentially your private power plant, harnessing the unlimited power of the sun and reducing our reliance on fossil fuels.

How does a PV system work?

A PV system works in a remarkably simple and efficient way. When sunlight hits the solar cells in a PV system, it excites the electrons in the cells and generates a flow of electric current. This process is known as the photovoltaic effect. Each solar cell is a small sandwich of semi-conductive material, typically silicon.
