Are solid-state batteries the future of energy vehicle technology?

In recent years, with the vigorous development of the new energy vehicle market, solid-state batteries, as the core of the next generation of power battery technology, are gradually moving from the R&D stage to mass production.

When will solid-state batteries be made?

The Japanese automaker, which is working on the technology through a joint venture with Panasonic, plans to mass produce the cells as early as 2027. South Korea's Samsung SDI has set up a pilot line for solid-state batteries and is also eyeing mass-production in 2027.

When will solid power produce all-solid-state batteries?

In November 2023, Solid Power announced that it had produced the first batch of solid-state battery A samples and delivered them to BMW, and according to the schedule, Solid Power will achieve mass production of all-solid-state batteries by 2030.

When will the all-solid-state battery production line start?

The design and construction of the all-solid-state battery production line are also accelerating at the same time, and it is planned to have mass production capacity in 2026, when it is expected to reduce the cost of all-solid-state batteries with polymer systems to 2 yuan/Wh, which is close to the cost of semi-solid-state batteries.

Will solid-state batteries be commercialised in 2027?

South Korea's Samsung SDI has set up a pilot line for solid-state batteries and is also eyeing mass-production in 2027. China's CATL is similarly aiming to commercialise its solid-state battery in 2027, but only for small-scale production, the company's chief scientist, Wu Kai, said at an industry forum in April.

Why did we start a solid-state battery?

"This is why we started this (solid-state) journey in the first place-so we could use lithium metal," noted Helena Braga, an associate professor of engineering physics at the University of Porto, in Portugal, and a well-known researcher who worked with Nobel Prize winner John Goodenough on solid-state batteries a decade ago.
