

Who is funding the energy storage Awards?

The Winners Are Set to Be Announced for the Energy Storage Awards! The grants will be funded by the EU's Emissions Trading System. Image: CC. The EU has today (23 November) launched a grant funding opportunity worth EUR4 billion (US\$4.4 billion) for upstream and downstream clean energy projects, including energy storage.

Should energy storage operators compete for subsidy contracts?

In several countries, revised capacity markets now allow energy storage operators to compete for subsidy contracts on a more equal footing with power generators. Support from the European Battery Alliance and EUR1 billion in loans from the European Investment Bank in 2020 alone should help shore up investor confidence.

How are pumped storage hydro projects funded in Spain?

The programmes are funded through Spain's coronavirus recovery facility. The Institute for Diversification and Energy Saving (IDAE), the agency of the ministry for the ecological transition, will manage the tendering process. Applications for funding for pumped storage hydro project can be sent from September 22 until October 20, 2023.

Does Europe support battery energy storage?

Policy support for battery energy storage is gaining momentum across Europe as national governments remove regulatory barriers and the EU pledges financial support for this emerging technology.

How can ASE help drive innovation in the energy storage sector?

Investment in research is key in driving innovation in the storage sector. EASE, as the voice of the energy storage industry, is an active contributor of the design of upcoming funding programmes for energy storage research and development and collaborated to the development of important instruments such as the Innovation Fund and Horizon Europe.

Are EU lawmakers lifting market barriers for energy storage?

EU lawmakers are also beginning to lift market barriers for energy storage. The EU's revised electricity directive (2019/944) stipulates that transmission system operators and distribution system operators should not own or operate storage facilities unless circumstances are exceptional.

The Spanish ministry for ecological transition on Thursday announced that it has granted EUR 150 million (USD 166.1m) of state aid drawn from NextGenEU funds to support 36 energy storage projects co-located with renewable energy facilities throughout Spain.

The moves come at a time when both sectors in Europe appear to be under ... this includes the expansion of the annual capacity by adding a new production line or improving existing lines with equipment not previously in ...

Spain and the Netherlands have launched subsidy schemes to support domestic manufacturing of clean energy technologies, including batteries and solar PV modules. The moves come at a time when both sectors in ...

The EU has today (23 November) launched a grant funding opportunity worth EUR4 billion (US\$4.4 billion) for upstream and downstream clean energy projects, including energy storage. The grant funding will come from the EU's Innovation Fund, which is funded by revenues from the bloc's Emissions Trading System (ETS), a scheme which aims to ...

This report documents the work completed for the Directorate General for Energy (DG ENER) of the European Commission (EC) on the Study on energy subsidies and other government interventions in the EU - 2023 edition (Framework Contract MOVE/ENER/SRD/2020/ OP/0008 Lot-2).

In southern Vietnam, Thailand, Malaysia, and other neighboring countries, the proportion of new energy installed capacity continues to rise, with energy storage systems playing a crucial role in utilizing renewable energy. Consequently, there is an expected increase in the installation of energy storage systems. Since the latter half of 2023, the household storage ...

It comes a few days after the EU's European Parliament approved the bloc's Net Zero Industry Act (NZIA), which seeks to ensure Europe can meet 40% of its clean energy deployment needs with domestically-manufactured products, as reported by our sister site PV Tech.. The new funding opportunity is split into five categories. The bulk, accounting for EUR2.4 ...

Applications for funding for pumped storage hydro project can be sent from September 22 until October 20, 2023. Submissions for standalone and thermal storage initiatives will be accepted from September 20 until ...

In several countries, revised capacity markets now allow energy storage operators to compete for subsidy contracts on a more equal footing with power generators. Support from the European...

The subsidies cover, among other things, customer-side energy storage systems. It is reported that the policy is funded by 320 million euros, of which 40% will be provided to the eight regions of Abruzzo, Basilicata, Calabria, Campania, Molise, Puglia, Sardegna and Sicilia, and the other 40% will be reserved for micro and small enterprises.

Applications for funding for pumped storage hydro project can be sent from September 22 until October 20, 2023. Submissions for standalone and thermal storage initiatives will be accepted from September 20 until October 18, 2023.

This report documents the work completed for the Directorate General for Energy (DG ENER) of the European Commission (EC) on the Study on energy subsidies and ...
