

Special-shaped solar panel bracket installation video

Why should you install a solar panel bracket?

The purpose of installing the bracket is to better fix the solar panel. If there is a more convenient and feasible method to fix the solar panel, PVMars will definitely recommend it to you, and effective solutions are based on solar panels' characteristics and your on-site installation environment.

How to install a solar panel?

The first step is to attach the fixing bracket to the solar panel. Lay the solar panel face-down on the tarp or canvas to protect the photovoltaic surface. You want to be sure the mounting holes on the back of the panel align with the holes in the fixing bracket. Don't modify the module frame because doing so may void your manufacturer's warranty.

How do you mount a solar panel?

Attach the Fixing Bracket to the Solar Panel's Mounting Hole. Now that you've aligned them properly, attach the fixing bracket to the mounting hole of the solar panel. Repeat this process on the other side of your solar panel. Ensure the bolts' alignment are symmetrical and fix the mounting holes at the same level.

How do I install rigid solar panels on my roof?

EcoFlow's rigid solar panels come with a EcoFlow Tilt Mount Bracket for easy rooftop installation. The components include four fixing brackets, two adjustable brackets, and screws. This should be all you need to mount rigid solar panels on the roof or any other flat surface on your home that receives direct sunlight.

How do you mount a solar panel on a tarp?

Lay the solar panel face-down on the tarp or canvas to protect the photovoltaic surface. You want to be sure the mounting holes on the back of the panel align with the holes in the fixing bracket. Don't modify the module frame because doing so may void your manufacturer's warranty. 3. Attach the Fixing Bracket to the Solar Panel's Mounting Hole

How to install a balcony Solar System?

But at the same time, it should be noted that if you also want to install a balcony solar system, you need to know the following points: 1- Make sure your balcony has enough space to accommodate the solar panel -- the general solar panel is about 1 meter long, and the largest solar panel is about 2 meters long at present.
