

Standard size diagram of suspended battery cabinet

How much clearance do you need for a battery cabinet?

Clearance: A minimum of four inches is required in both the front and the rear of the cabinet. This refers to obstruction of ventilation only. Clearance around cabinet sides is suggested by NEC and local codes. CAUTION! Explosion/Fire Hazard Warning: Batteries can generate potentially explosive gas (hydrogen).

How much does a battery cabinet weigh?

Battery cabinet systems are very heavy. Total weight of a loaded cabinet can exceed 6100 lbs. Use at least 3 people when unloading and setting equipment in place. It is imperative that only qualified personnel work on this system and installation, maintenance or upgrades be performed with insulated tools and equipment.

How do I install a battery cabinet?

Install plastic covers onto batteries. Some covers may need to be notched for locations with bus bars and/or cables in upward orientation. Ground the battery cabinet to the main building ground. A ground stud inside the cabinet is provided for this. Refer to the UPS or charger manual for start up and operation of system.

How do you ground a battery cabinet?

Ground the battery cabinet to the main building ground. A ground stud inside the cabinet is provided for this. Refer to the UPS or charger manual for start up and operation of system.

8. SYSTEM MAINTENANCE

What should I know before installing a battery cabinet system?

Never enclose batteries or battery cabinets in a sealed air tight room. All jewelry and watches must be removed prior to installing or servicing this system. Do not smoke or present flame near or around any battery cabinet system. Never leave a panel off or door open and unattended.

3. INSPECTION UPON RECEIPT OF GOODS

What temperature should a battery be stored in?

Any storage shall be in a dry area having ambient temperature of 77°F (25°C), or less, and in accordance with battery manufacturer published installation, operation and maintenance instructions.

The CA Series battery cabinets are designed to be integrated with top terminal, Valve Regulated Lead Acid (VRLA) batteries for Uninterruptible Power Supply (UPS) applications. These cabinets are tested and labeled to UL-1778 when shipped fully assembled with batteries.

ESS EFC52 & EFC54 Series Front Terminal Battery Cabinets are shipped partially assembled, internally pre-wired and come standard with an over current breaker. The removable hinged front doors and removable rear cover also allow for easier battery access.
