

State-subsidized solar panels

Which states offer free solar panels?

Illinois and Maryland are states where, if you meet the income requirements, you could qualify for free solar installations. Other incentives include renewable energy credits that could cover about a third of the cost of a system in Illinois, and property tax adjustments to lower your tax bill in both states.

Can you get a tax credit for installing solar panels?

It's possible to install solar panels on your property and receive money back in every state in the U.S. The most important solar incentive is the 30% federal solar tax credit, which is available to taxpayers across the country.

Which states offer incentives for solar panels?

Each state offers different tax credits, rebates, and net-metering policies that can offset the cost of a solar installation. New York is one of the top seven states for solar incentives. The economics of installing solar on your home make sense, but these programs can sweeten the pot even more.

Which states have solar tax credits?

Arizona, Hawaii, Massachusetts, New Mexico, New York, South Carolina, and Utah also have personal tax credits to incentivize solar adoption. About half of states don't have any statewide financial incentives for solar panels, solar water heaters, and energy storage devices.

How do state solar tax credits work?

State solar tax credits will vary based on where you live and can make solar panels more affordable when combined with the federal solar credit. This page covers what you should know about solar panel incentives by state, the federal tax credit, and how to apply for solar energy incentives.

What incentives are available if you install solar panels in New York?

NY-Sun Program: NY-Sun offers several financial incentives if you install solar panels. This initiative funds New York's Megawatt Block Incentive (a rebate program offering money based on the size of your system) and the state's community solar program.
