

## The charging battery power is very low

What if my battery charge is less than 10%?

CAUTION: If the battery charge is less than 10%, you may be able to force the BIOS to update from within the DOS environment. A failure during this process causes permanent damage to the system board of the computer. Users must proceed at their own risk.

How to fix battery not charging problem Windows 10?

To see if Windows can fix the battery not charging problem, you can run the power troubleshooter. 1. In the search type "troubleshoot settings" and then click to open them from the search results. 2. In the 'Troubleshoot' window, select Additional troubleshooters. 3. Scroll down and click on Power.

Why can't I charge my laptop with a removable battery?

The charger isn't connected to the charging port on your PC. This solution usually works when the device (with a removable battery) charges slowly because it is constantly plugged in. Here is how to go about it: Disconnect the charger and remove the battery from the device. Press and hold the power button for a minimum of 30 seconds.

Why is my laptop battery not charging when plugged in?

When the battery discharge rate is higher than the battery charge rate, it seems the battery is not charging even when plugged in. Such an issue is common while playing heavy graphics games. Some heavy graphics games draw more power than the charger is providing to the laptop battery to get charged.

Why does my laptop display a low battery message?

Please read the entire post & the comments first, create a System Restore Point before making any changes to your system & be careful about any 3rd-party offers while installing freeware. If your laptop displays Low battery message even when plugged in, there might be an issue with the battery. Use these fixes to resolve the issue.
