

Who can repair lead-acid battery warranty

When does a battery warranty start?

For a battery being replaced on Free of Cost basis the warranty commences from the date of sale of the original battery as stated in the original Invoice and not from the date of replacement given. For batteries purchased on pro-rata warranty settlement discount, a fresh warranty is applicable from the date of purchase.

What is the design life of a lead acid battery?

Europe took a different tack. The Eurobat Guide for the Specification of Valve Regulated Lead-Acid Stationary Cells and Batteries defines design life as follows: "The design life is the estimated life determined under laboratory conditions, and is quoted at 20 \pm 17 \pm 6;C using the manufacturer's recommended float voltage conditions." 6

Are lead acid batteries toxic?

Lead acid batteries contain Lead & Sulphuric Acid which are highly toxic and extremely hazardous for health and environment. Lead poisoning affects the Central Nervous System causing irreversible retardation and subsequent death. Unauthorized smelters tend to pollute the air and ground water with these toxic substances during smelting.

Is a lead-acid battery a good battery?

It is accepted industry practice that a battery is considered "good" or reliable as long as it can deliver $\geq 80\%$ of its rated capacity¹. IEEE 450 and 1188 prescribe best industry practices for maintaining a lead-acid stationary battery to optimize life to 80% of rated capacity.

What is the warranty on Exide Batteries?

The label on every Exide battery specifies the total number of months covered by the free replacement period and the Pro-Rata period for batteries fitted in private cars, multi-utility vehicles*, two-wheelers, inverters, gensets and solar applications. In all cases the warranty is applicable from the date of sale to the original purchaser.
