

# You need to bring solar charging panels when you go to China

How to import solar panels from China?

Embarking on the importation of solar panels from China is a journey that intertwines various intricate steps, encompassing the understanding of local import laws, in-depth market analysis, stringent supplier assessments, and effective handling of logistics and customs. This comprehensive process demands a strategic and meticulous approach.

Do solar panels need customs clearance in China?

Imported solar panels require customs clearance in China and the destination country. Familiarize yourself with your country's customs regulations and tariffs to avoid any unexpected delays or fees. Prepare all necessary documents including invoices, packing lists and certificates of origin.

Are solar panels regulated in China?

Most solar panel manufacturers in China supply all necessary system components, but you should never suppose that those items conform to your country's regulatory requirements. Many vendors are not aware that the elements used in China's solar panels are incompatible with the standards and legislation of other countries.

How does China supply solar panels?

Complete supply chain: China has a complete solar panel industry chain, with strong strength from raw material supply, production equipment to manufacturing technology. This enables China to stably supply various types and specifications of solar panels to meet the needs of different customers.

Why should you buy solar panels from China?

Due to China's advantages in production scale, technological level and supply chain integration capabilities, its solar panel manufacturing costs are relatively low. This makes Chinese products price competitive in the international market, attracting a large number of overseas buyers.

How many solar panels should be ordered in China?

Most solar panel plants in China determine the minimum order quantity (MOQ) based on the effectiveness (W). For example, a supplier may define the MOQ as 10,000W. If the mean power per solar panel is 120W, then 83 solar panels should be ordered. Some suppliers have MOQ requirements that are much lower or nonexistent.

So, as a rule, it's not a good idea to use a large solar panel to charge a small battery. Another variable to consider is the batteries charging current limit. You need to check that your battery can receive the output current of the solar ...
